Plan of Care for:
DAILY/ROUTINE ANAPHYLAXIS MANAGEMENT
SYMPTOMS A STUDENT HAVING AN ANAPHYLACTIC REACTION MIGHT HAVE <u>ANY</u> OF THESE SIGNS AND SYMPTOMS:
 Skin system: hives, swelling (face, lips, tongue), itching, warmth, redness. Respiratory system (breathing): coughing, wheezing, shortness of breath, chest pain or tightness, throat tightness, hoarse voice, nasal congestion or hay fever-like symptoms (runny, itchy nose and watery eyes, sneezing), trouble swallowing. Gastrointestinal system (stomach): nausea, vomiting, diarrhea, pain or cramps. Cardiovascular system (heart): paler than normal skin colour/blue colour, weak pulse, passing out, dizziness or lightheadedness, shock. Other: anxiety, sense of doom (the feeling that something bad is about to happen), headache, uterine cramps, metallic taste. EARLY RECOGNITION OF SYMPTOMS AND IMMEDIATE TREATMENT COULD SAVE A PERSON'S LIFE.
Avoidance of an allergen is the main way to prevent an allergic reaction.
Food Allergen(s): eating even a small amount of a certain food can cause a severe allergic reaction. Food(s) to be avoided:
Safety measures:
Insect Stings : (Risk of insect stings is higher in warmer months. Avoid areas where stinging insects nest or congregate. Destroy or remove nests, cover or move trash cans, keep food indoors.)
Designated eating area inside school building
Safety measures:

Plan of Care for: _____

EMERGENCY PROCEDURES (DEALING WITH AN ANAPHYLACTIC REACTION)

ACT QUICKLY. THE FIRST SIGNS OF A REACTION CAN BE MILD, BUT SYMPTOMS CAN GET WORSE QUICKLY.

STEPS

- 1. Give epinephrine auto-injector (e.g. EpiPen®) at the first sign of known or suspected anaphylactic reaction.
- 2. Call 9-1-1 or local emergency medical services. Tell them someone is having a lifethreatening allergic reaction.
- 3. Give a second dose of epinephrine as early as five (5) minutes after the first dose if there is no improvement in symptoms.
- 4. Go to the nearest hospital immediately (ideally by ambulance), even if symptoms are mild or have stopped. The reaction could worsen or come back, even after treatment. Stay in the hospital for an appropriate period of observation as decided by the emergency department physician (generally about 4 6 hours).
- 5. Call emergency contact person; e.g. Parent(s)/Guardian(s).
